

Looking Inside the Computer

Saeed Siddik, IIT University of Dhaka

The Computer Defined

- ▶ Electronic device
- ▶ Converts data into information
- ▶ Modern computers are digital
 - ▶ Two digits combine to make data
- ▶ Older computers were analog
 - ▶ A range of values made data

Computers For Individual Use

- ▶ **Desktop computers**

- ▶ The most common type of computer
- ▶ Sits on the desk or floor
- ▶ Performs a variety of tasks

- ▶ **Workstations**

- ▶ Specialized computers
- ▶ Optimized for science or graphics
- ▶ More powerful than a desktop

Computers For Individual Use

- ▶ **Notebook computers**
 - ▶ Small portable computers
 - ▶ Weighs between 3 and 8 pounds
 - ▶ About 8 ½ by 11 inches
 - ▶ Typically as powerful as a desktop
 - ▶ Can include a docking station

Computers For Individual Use

- ▶ **Tablet computers**
 - ▶ Newest development in portable computers
 - ▶ Input is through a pen
 - ▶ Run specialized versions of office products

Computers For Individual Use

- ▶ **Smart phones**
 - ▶ Hybrid of cell phone and Personal Digital Assistants
 - ▶ Very small computers
 - ▶ Can do anything same as tablet computer
 - ▶ Can use GPS, GSM Sim and other mobile phone services
 - ▶ Web surfing, e-mail access

Computers For Organizations

- ▶ Network servers
 - ▶ Centralized computer
 - ▶ All other computers connect
 - ▶ Provides access to network resources
 - ▶ Multiple servers are called server farms
 - ▶ Often simply a powerful desktop

Computers For Organizations

▶ Mainframes

- ▶ Used in large organizations
- ▶ Handle thousands of users
- ▶ Users access through a terminal
- ▶ Extremely high throughput and reliability

Computers For Organizations

▶ Minicomputers

- ▶ Called midrange computers
- ▶ Power between mainframe and desktop
- ▶ Handle hundreds of users
- ▶ Used in smaller organizations
- ▶ Users access through a terminal

Computers For Organizations

- ▶ **Supercomputers**
 - ▶ The most powerful computers made
 - ▶ Handle large and complex calculations
 - ▶ Process trillions of operations per second
 - ▶ Found in research organizations

Computers In Society

- ▶ **More impact than any other invention**
 - ▶ Changed work and leisure activities
 - ▶ Used by all demographic groups
- ▶ **Computers are important because:**
 - ▶ Provide information to users
 - ▶ Information is critical to our society
 - ▶ Managing information is difficult

Computers In Society

- ▶ **Computers at home**
 - ▶ Many homes have multiple computers
 - ▶ Most American homes have Internet
 - ▶ Computers are used for
 - ▶ Business
 - ▶ Entertainment
 - ▶ Communication
 - ▶ Education

Computers In Society

- ▶ **Computers in education**
 - ▶ Computer literacy required at all levels
- ▶ **Computers in small business**
 - ▶ Makes businesses more profitable
 - ▶ Allows owners to manage
- ▶ **Computers in industry**
 - ▶ Computers are used to design products
 - ▶ Assembly lines are automated

Computers In Society

- ▶ Computers in government
 - ▶ Necessary to track data for population
 - ▶ Police officers
 - ▶ Tax calculation and collection
 - ▶ Governments were the first computer users

Computers In Society

- ▶ **Computers in health care**
 - ▶ Revolutionized health care
 - ▶ New treatments possible
 - ▶ Scheduling of patients has improved
 - ▶ Delivery of medicine is safer

How two digits combination make data

- ▶ Computer store data as binary number (0,1)
- ▶ Everything we pressed in Keyboard convert to binary
- ▶ Use ASCII code to convert data to binary

Common Number Systems

| System | Base | Symbols | Used by humans? | Used in computers? |
|--------------|------|--------------------------|-----------------|--------------------|
| Decimal | 10 | 0, 1, ... 9 | Yes | No |
| Binary | 2 | 0, 1 | No | Yes |
| Octal | 8 | 0, 1, ... 7 | No | No |
| Hexa-decimal | 16 | 0, 1, ... 9, A, B, ... F | No | No |
| Penta | 5 | 0,1,2,3,4 | No | No |

Quantities / Counting

| Decimal | Binary | Octal | Hexa- decimal |
|---------|--------|-------|------------------|
| 0 | 0 | 0 | 0 |
| 1 | 1 | 1 | 1 |
| 2 | 10 | 2 | 2 |
| 3 | 11 | 3 | 3 |
| 4 | 100 | 4 | 4 |
| 5 | 101 | 5 | 5 |
| 6 | 110 | 6 | 6 |
| 7 | 111 | 7 | 7 |

Quick Example

$$25_{10} = 11001_2 = 31_8 = 19_{16}$$

How computer store data

- ▶ The data below has been written in an 8-bit computer.
- ▶ Retrieve what is written there.

01010000 01011001 01010100 01001000 0100111101001110

How computer store data?

01010000 01011001 01010100 01001000 0100111101001110

| | | | | | | | | | |
|---|----|---|----|---|----|---|----|---|----|
| A | 65 | G | 71 | M | 77 | S | 83 | Y | 89 |
| B | 66 | H | 72 | N | 78 | T | 84 | Z | 90 |
| C | 67 | I | 73 | O | 79 | U | 85 | | |
| D | 68 | J | 74 | P | 80 | V | 86 | | |
| E | 69 | K | 75 | Q | 81 | W | 87 | | |
| F | 70 | L | 76 | R | 82 | X | 88 | | |
